**Subject:** RE: auDA may confiscate and restrict your domain names

Hi,

I received the email below from an American association trying to interfere with Australia's namespace rules.

I do NOT want Australian namespace to turn further into a domain grab. As it is the previous relaxing of the rules governing namespace ownership was, I believe, a backward step. I would welcome auDA's tightening of the rules to ensure namespaces are allocated in a fair manner.

Please do not be swayed by this American group who want to buy up domains and sit on them. That is pure capitalism and not a fair and equitable system.

Cheers  
pmk
